Feature Tested:

Manual Test Case

(Editor Section)

Test Case ID	Test Scenario	Test Steps	Expected Result	Actual Result	Status
TC-001	Verify upload size limit (20MB)	• 1. Open Image Converter 2. Select any format (To JPG/PNG/WebP)3. Upload image larger than 20MB	The system allowed uploading an image larger than the specified limit and successfully converted it. File size restriction is not enforced.	The Document is loaded successfully when choosing the file	FAIL
TC-002	Slow internet / delayed response handling	• 1. Simulate slow network 2. Upload image 3. Download the converted file	System should handle slow network conditions and allow	Upload and conversion completed successfully under slow network conditions, and the file	PASS

Feature Tested:

			successful download	was downloadable even without an active internet connection afterward.	
TC-003	Convert JPG to PNG (Valid Case)	• 1. Select "To PNG"2. Upload JPG 3. Click Convert	PNG file generated successfully	The system successfully converted the uploaded JPG image to PNG format. The resolution remained the same.	PASS
TC-004	Toolbar Visibility	• 1. Select any format 2. Click Download without uploading	Error message should be displayed	The convert button remains hidden until a file is uploaded, preventing the user from performing the action without input	PASS
TC-005	Upload unsupported file (Negative)	• 1. Upload .txt/.pdf file	System should reject file and show error	The system rejected unsupported file formats and did not	PASS

Feature Tested:

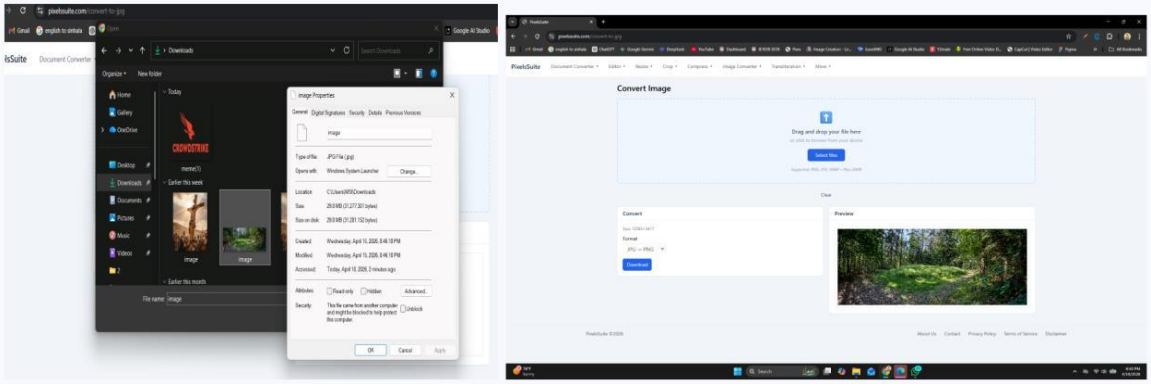
				allow the upload	
TC-006	Click download button multiple times (Stress Test)	• 1. Open Image Converter 2. Upload image3. Convert to any format 4. Once download button appears, click it multiple times rapidly (5-10 times)	System should handle clicks properly without crashing. Only one file should download OR multiple downloads should work correctly without errors	File downloads successfully even when the download button is clicked multiple times. No lag, crash, or system freeze was observed	PASS
TC-007	Refresh page during conversion	• 1. Upload image2. Attempt to refresh page during conversion process	System should handle interruption gracefully without crashing	Conversion is triggered immediately upon file upload, leaving no opportunity to refresh during the process. Therefore, this scenario could not be executed.	PASS

Feature Tested:

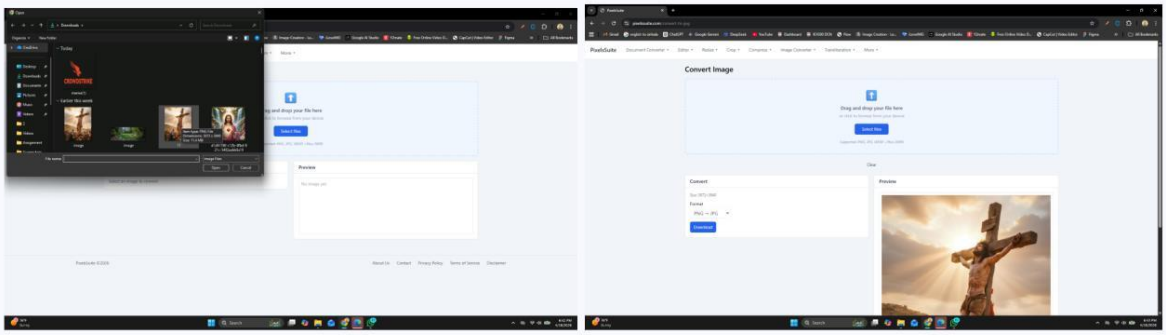
Test Case ID:- M/T-01

Test Scenario :- Image Convertor

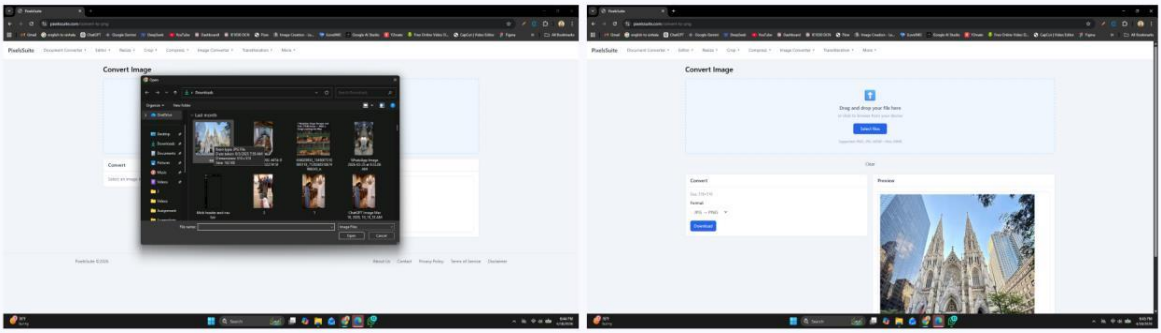
TC-001 - Verify upload size limit (20MB)



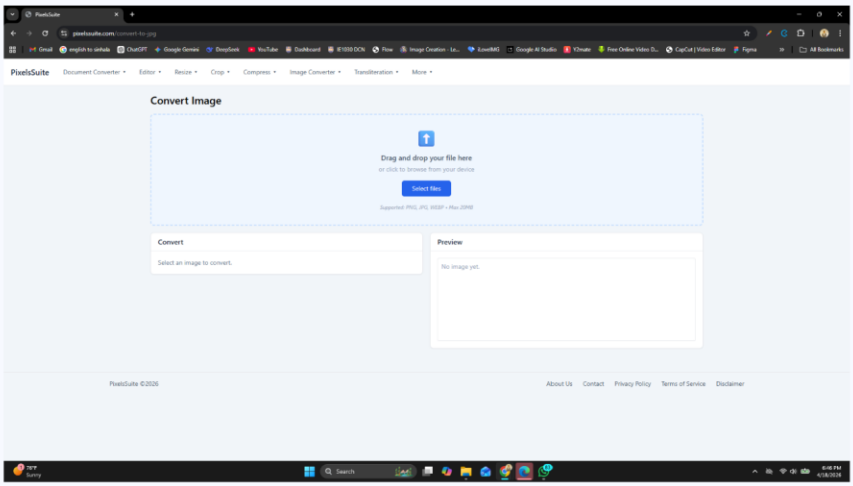
TC-002 - Slow internet / delayed response handling



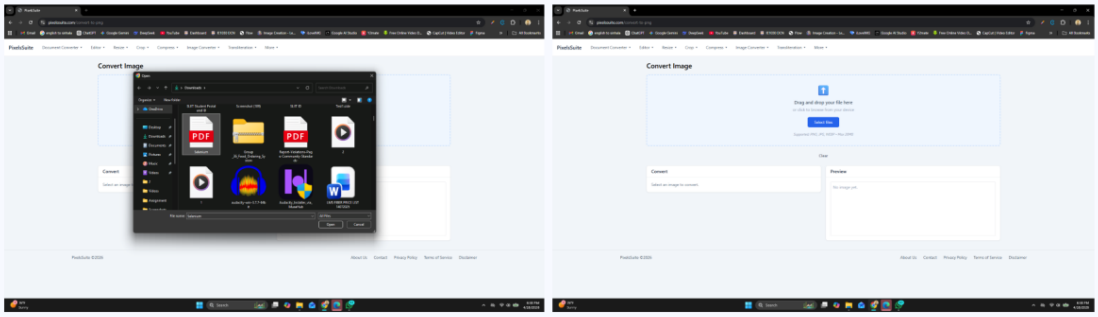
TC-003 - Convert JPG to PNG (Valid Case)



Feature Tested:

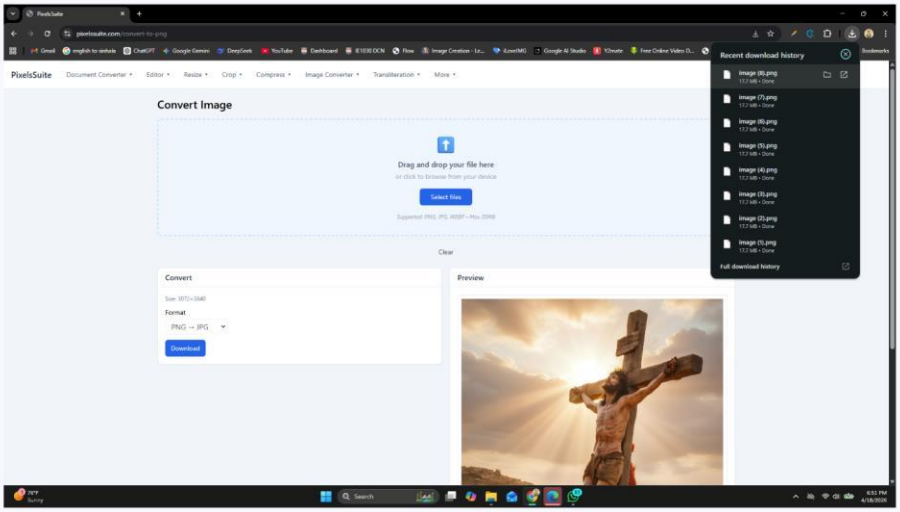


TC-005 - Upload unsupported file (Negative)

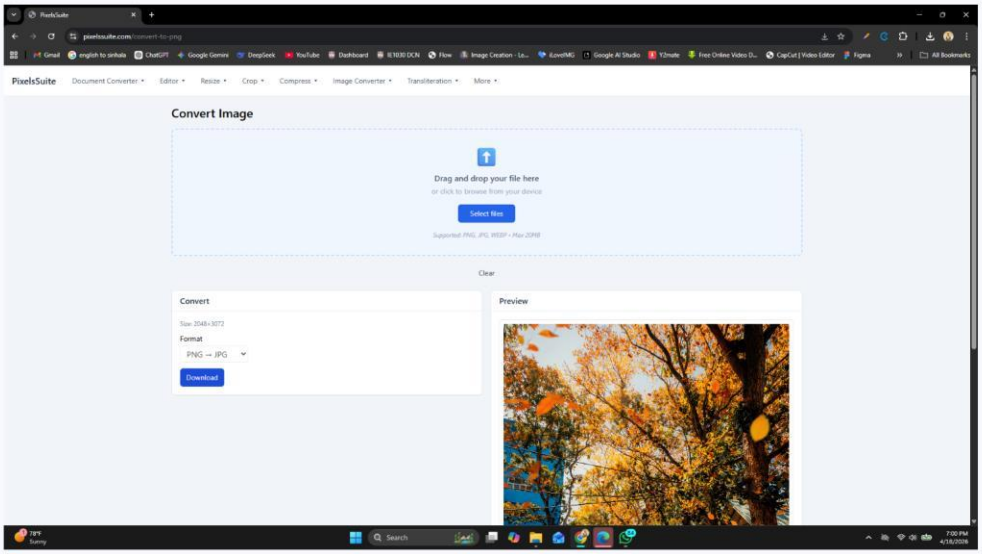


TC-006 - Click download button multiple times (Stress Test)

Feature Tested:

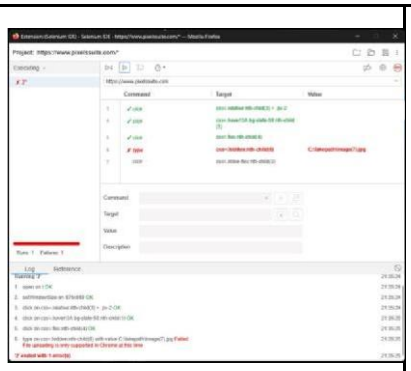


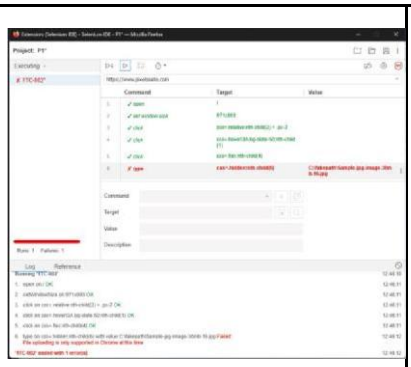
TC-007 - Refresh page during conversion

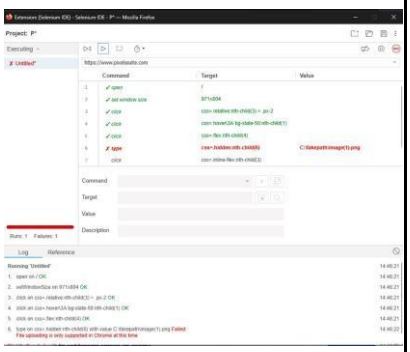


Automated Test Case :- Selenium IDE

Feature Tested:







Automation Script

Automated testing was performed using the recording feature of selenium IDE instead of writing scripts.

Rest Execution Screenshots

Featured Tested: Resize image / Bulk Resize / Image Enlarger

Feature Tested:

Defect ID	Module	Description	Steps to Reproduce	Expected Behavior	Actual Behavior	Severity	Status

Feature Tested:

D-001	Image to PDF	File size limit (20MB) not enforced	1. Upload image >20MB	System should reject large file	Large file uploads without error	High	Open
D-002	PDF to Word	Unsupported file types are accepted	1. Upload unsupported file (e.g., MP3)	System should reject unsupported formats	Unsupported file uploads without error	High	Open
D-003	Image to PDF	Image arrangement option not working	1. Upload images 2. Select vertical/horizontal	Output should change based on selection	Same output generated for both options	Medium	Open
D-004	Image to PDF	Multiple pages option not functioning	1. Select multiple pages option (e.g., 10 pages)	System should generate multiple pages	Only single page generated	High	Open
D-005	PDF to Word	No preview before download	1. Upload PDF 2. Convert	System should show preview before download	File downloads automatically without preview	Medium	Open

Feature Tested:

D-006	Resize Image	Output format not preserved	1. Upload JPG/WEBP 2. Resize	Output format should match input	Output always downloads as PNG	Medium	Open
D-007	Resize Image	File size validation not enforced	1. Upload image >20MB	System should reject large files	System allows upload beyond limit	High	Open
D-008	Resize Image	Input field editing usability issue	1. Try editing resize value	Should allow easy overwrite	User must manually delete value first	Low	Open
D-009	Resize Image	Missing labels for width and height fields	1. Open resize page	Fields should be labeled clearly	No labels shown	Medium	Open
D-010	Bulk Resize	Not all uploaded images processed	1. Upload multiple images (>2)	All images should be processed	Only 2 images processed	High	Open
D-011	Image Convert er	File size restriction not enforced	1. Upload image >20MB	Should reject file	File accepted and converted	High	Open

Feature Tested:

D-012	Download	Multiple downloads allowed without restriction	1. Click download multiple times	Should restrict or manage downloads	Multiple downloads triggered	Low	Open
D-013	Meme Generator	Output format mismatch	1. Upload image 2. Download	Output format should match input	Output always PNG	Medium	Open

Feature Tested:
